Building Relationships

Erecting a new building is not something anyone can do alone. The same is true for planning one. Rely on the Bunger Steel team to provide you with the expertise and personalized service you deserve. In addition to listening to your individual needs, we can offer advice on zoning, variances and infrastructure. You can also count on continuous updates and immediate responses to any questions you may have before, during and after construction, because Bunger takes the lead in all aspects of service.

welcome

to the Family

Because Bunger Steel is family-owned and operated you are more than a client, you're part of the family. From our turn-key classic garage to the most sophisticated building systems, you will discover the difference working with the Southwest's premier pre-engineered steel building manufacturer.

Building Relationships Today for a Stronger Tomorrow

Whether it's a 500-square-foot garage or a 200,000-square-foot industrial warehouse, your Bunger Steel building will be designed by a team of experienced engineers. We'll work with you through every step to ensure that each detail is executed to your exact standards. A vast collection of components and accessories enable you to add the custom touches you desire.

*Bunger Steel is not only
a better choice for
your building,*

It's a better decision for the environment. Because steel is 100% recyclable without any degradation in strength, nearly 100% of our beams and components come from reclaimed materials. Steel buildings use fewer resources to construct and are reusable thus extending the life of the structure. With superior insulating capacity and options such as skylights, they are also extremely energy-efficient. We'll help you make a lasting impact with your building while making less of an impact on the environment.

Better by Design

BETTER
DESIGN

Detailed Differences —

Integrated ventilation. Sectional doors. Double-layered insulation. The highest-gauge steel panels in various-corrugated patterns and available in nearly any color. Because we manufacture all of our components at our Phoenix facility, there is nothing standing between you and the structure you want.

An Enduring Vision —

Residential, agricultural, industrial or commercial, your building speaks volumes about your taste and style. Bunger Steel's premium pre-engineered structures are designed to last, which is why they are guaranteed for years. And with an extensive array of textures and finishes, everyone will see the beauty of your vision.

Structural Integrity —

Unlike most steel builders, Bunger is the actual fabricator, not a broker, so you can be assured the product you receive is of superior quality. From the solid structural engineering of our buildings to the honesty and reliability of everyone in our organization, integrity is the foundation of every quality, pre-engineered structure we build. Family owned and operated for almost 40 years, trust Bunger Steel to deliver the building you need and the service you deserve.

GARAGES

Your home is most likely your greatest investment; a Bunger Steel metal roof can help you protect that investment. While alternative roofing systems come with a 5-7 year warranty a Bunger Steel roofing system comes with a 20 year product and 35 year paint warranty. A Bunger steel roofing system is the most logical solution for any application based on cost, efficiency, lifespan, appearance, added resale value to your property and ease of maintenance. As if that wasn't reason enough to buy a Bunger Steel roofing system, they also qualify for EnergyStar tax credits and will increase your savings on your energy and insurance bills. See....your Bunger roof is already paying for itself.

Second only to the pride of your home investment, surely is the pride of your automobile and recreational vehicles. Bunger Steel garages provide a safe keeping for your pride and joy. A steel garage boasts a highly efficient and structurally sound design, while complimenting the appearance of your home. Complete your garage with a vast line of finishes such as stucco, block or glass to match its surroundings to perfection. Our sturdy and energy efficient designs provide the best protection for your boat, RV, or toys.

Residential / Garages

RV / Mini Storage

*Your mini-storage project is unique.
Allow custom-fabricated steel
structures from Bunger Steel to
reflect your vision.*

You need a mini-storage complex that is durable, attractive and built to withstand the elements and other hazards, including theft and fire. That's why you need Bunger Steel. Whether you're planning a self-storage facility with many units or an RV storage center where clearance and maneuverability are important, Bunger Steel has a solution. We offer complete design and development services to compliment any unit mix.

With a colorful array of trim options, multiple door and entry styles and a variety of eave heights, Bunger Steel will help you create a facility that is both functional and durable.

Solid steel construction means your facility will maintain structural integrity in a wide range of conditions, giving you and your customers an added sense of security. Our superior service and attention to detail in everything we do, from first plans to final product translates into quicker construction time and faster occupancy. Your projects can pay for themselves sooner, often even in a matter of months! The collateral savings of our efficient service doesn't cost...it pays.

For storage facilities that have a lock on strength, quality and value, trust Bunger Steel. It's our job to protect your assets. We insist on giving your customers real value for their construction dollar.

With millions of completed square feet in our portfolio, our mini-storage buildings provide superior quality, engineered performance and unparalleled design flexibility.

RV / STORAGE 

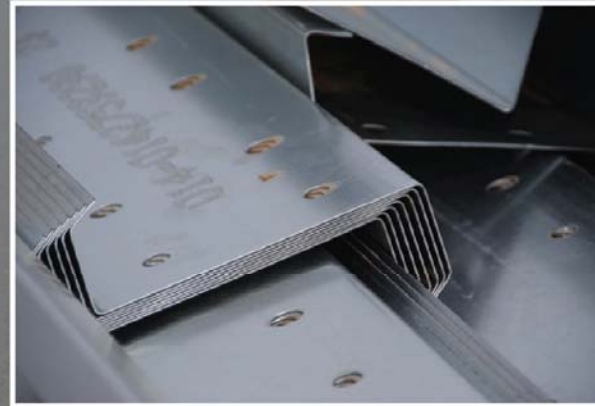

For over 30 years Bunger Steel has been dedicated to creating high-quality and innovative custom engineering for everything from residential garages to commercial aircraft hangars and manufacturing plants. Throughout each stage of design and production, Bunger Steel remains committed to the in-house fabrication of all-American steel component pieces to meet any and all of your construction needs.

With Bunger Steel's extensive fabrication of steel parts, all your component pieces are readily accessible. With quick delivery and less lead-time needed, your production needs are consistently met. From the smallest nuts and bolts to roof replacement, our highly trained and knowledgeable team will answer all your questions and provide the parts you need to get the job done.

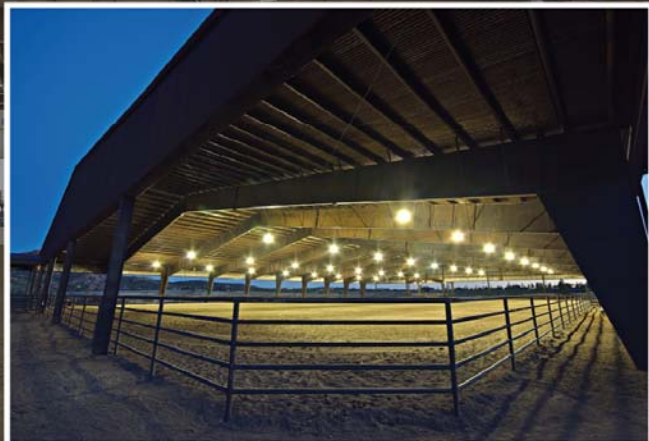

From roof panels and canopies to roll up doors and skylights, Bunger Steel has a wide array of components and accessories designed to enhance the beauty and functionality of your Bunger Steel building. Because our components are manufactured in our own facility, there is no waiting for the parts you need and you can expect Bunger's highest standard of quality in everything we produce.

Components

Equestrian

*When it comes
to building
your equestrian
arena, stick
with a
thoroughbred.*

With Bunger Steel's durable, affordable equestrian facilities, an extensive array of wide-span frame options maximizes interior space while minimizing pillars that may obstruct spectator sight lines. Our vast experience provides for easy groundskeeping and flexible layout of activity arenas, livestock pens, holding areas or storage.

Fabricated from the highest-grade American steel, a Bunger riding facility is built to withstand the rigors of regular use while maintaining strength, durability and an attractive facade. Riding enthusiasts will enjoy a well-maintained arena that is sheltered from the elements, keeping it pristine for show jumping, barrel racing, rodeos and many other equine events.

As the largest builder of riding arenas in the Southwest, we have the most experience with these types of structures, allowing our clients to avoid many of the costly pitfalls encountered when erecting a new arena. From the smallest corrals to stadiums occupied by thousands of spectators, Bunger Steel's custom structures and experienced staff can save you thousands of dollars through single-source accountability from project start to finish.

When building an equestrian center or riding arena, an expansive Bunger Steel facility may be the next best thing to the wide open spaces.

EQUESTRIAN

Church / Public Buildings

Whether we work as a sole-source provider or as a trusted partner in conjunction with your chosen contractors, we ensure to provide you a beautiful, cost-effective showpiece that will last for decades to come. With the flexibility to grow as your needs expand, Bunger Steel's engineers will work with you through every step of the design process until you are completely satisfied.

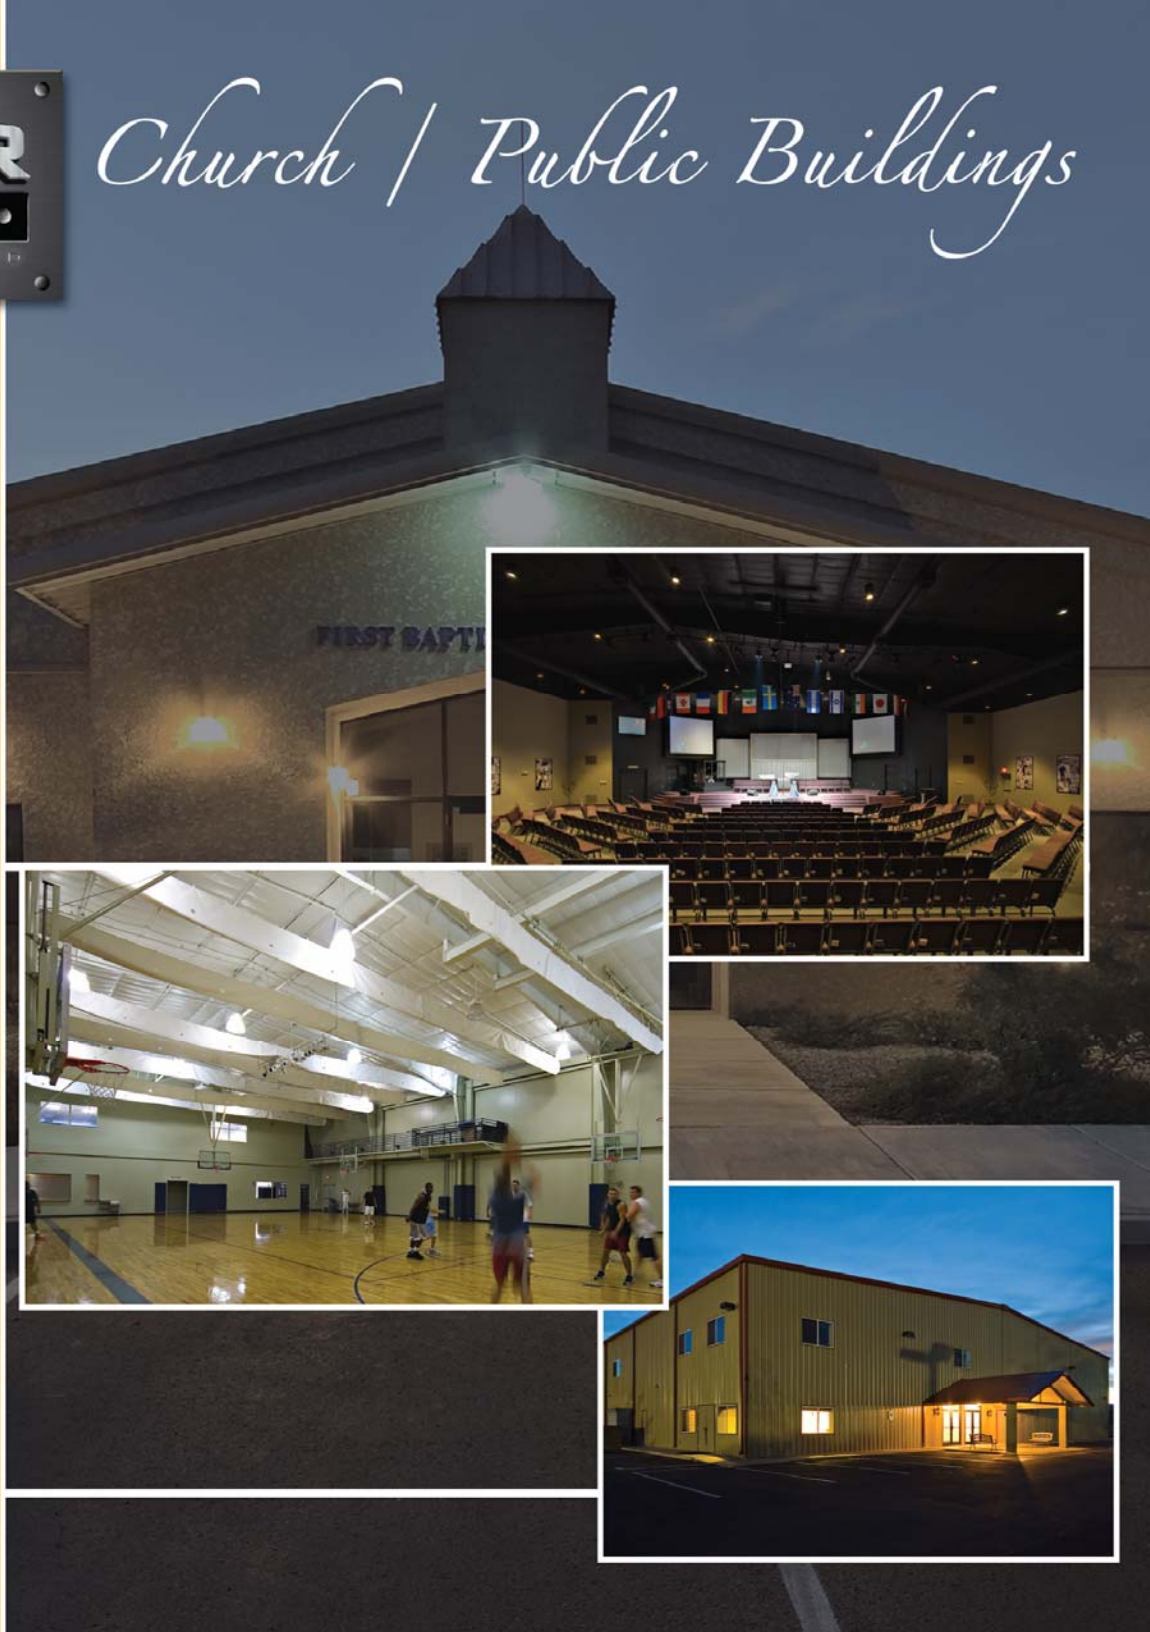

Whether you're looking to maximize interior space for indoor sports courts or want to seamlessly integrate more usable square footage into an existing structure, Bunger Steel buildings are energy efficient and can be erected in a fraction of the time of other construction methods.

We have a complete list of references and show buildings throughout the Southwest, allowing the members of any building committee to come and see firsthand what sets Bunger apart from the rest. In our business, the highest compliment we can receive as a partner in church projects is the opportunity to do it over again!

A cost-effective and attractive alternative for churches, multi-purpose fellowships, gymnasiums, schools and more, Bunger Steel buildings are beautiful, functional and constructed from the highest-grade American steel. We've been privileged to manufacture structures like these since 1975, and we understand the need for full cost accountability to maximize your building dollar.

CHURCH

Agricultural

BUNGER
STEEL
INCORPORATED

With ideal solutions for working ranches, commercial farms, private horse owners or large-scale livestock operations, Bunger Steel can help you plant the seeds of success.

Storage, protection, production. It is critical that your agricultural building is given precise weather and loading requirements to last a lifetime.

With Bunger Steel, functionality can still be beautiful. From shelter for working farms to an entire equestrian riding center, Bunger Steel's agricultural buildings are firmly rooted in value.

Made from the highest-grade American steel, fabricated in our own factory, our buildings are built to perform year after year. Economical, efficient and friendlier to the environment, steel agricultural buildings make more sense than traditional construction because they can easily adapt as your operation grows.

Bunger Steel will design and build the exact building you need to custom specifications. And because we are the steel manufacturer as well, we can assure superior quality in every step of the process. A wide variety of component options can transform a simple shed into a multi-port maintenance area, feed storage location or horse barn.

AGRICULTURE

Bunger Steel commercial and industrial structures are built from solid American steel of superior strength, fabricated in our plant. And because we're both the builder and manufacturer of your building, we can assure the highest degree of quality every step of the way.

When you choose Bunger Steel you choose a single source provider that both designs and fabricates your building; maximizing cost efficiency and minimizing confusion.

Your company is unique and Bunger Steel understands that even simple facilities have special needs. We'll work closely with you to ensure you get the exact structure you want, with style and finishes that send the right message about your business.

A variety of textured exterior options add a level of sophistication to your location that complements the surrounding landscape. The solid steel construction and beauty of your warehouse or storage facility convey strength and security.

Bunger Steel commercial and industrial structures are built to last as long as you're going to be in business- A lifetime.

Commercial / Industrial

From a corporate headquarters to a manufacturing plant to a warehouse, the building you're in says just as much about the quality of your company as the work you do.

Aircraft

BUNGER
STEEL
INCORPORATED

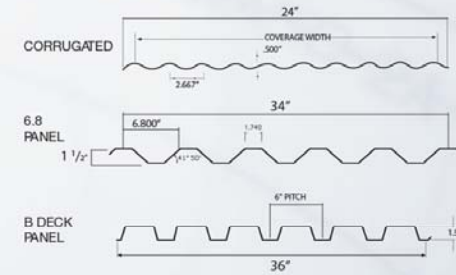

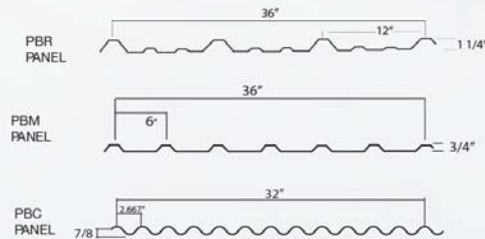

Bunger Steel aircraft hangars are constructed of the highest-quality American steel, fabricated in our own factory, so we can guarantee the strength, durability and functionality of your building. From a personal trainer with a 30-foot wingspan to a twin-engine corporate jet with a wingspan of more than 90 feet, Bunger Steel will provide a custom-engineered solution to securely and comfortably house any aircraft.

Private pilots can add an exterior overhang to protect an RV near their private hangar, while commercial operators can maximize space by adding a machine shop, lounge, storage area or office space. With Bunger Steel's variety of corrugated wall designs and nearly endless array of component options – from bi-fold and hydraulic-lift doors to windows and accent moldings – your exact vision of your aircraft hangar can truly take flight.

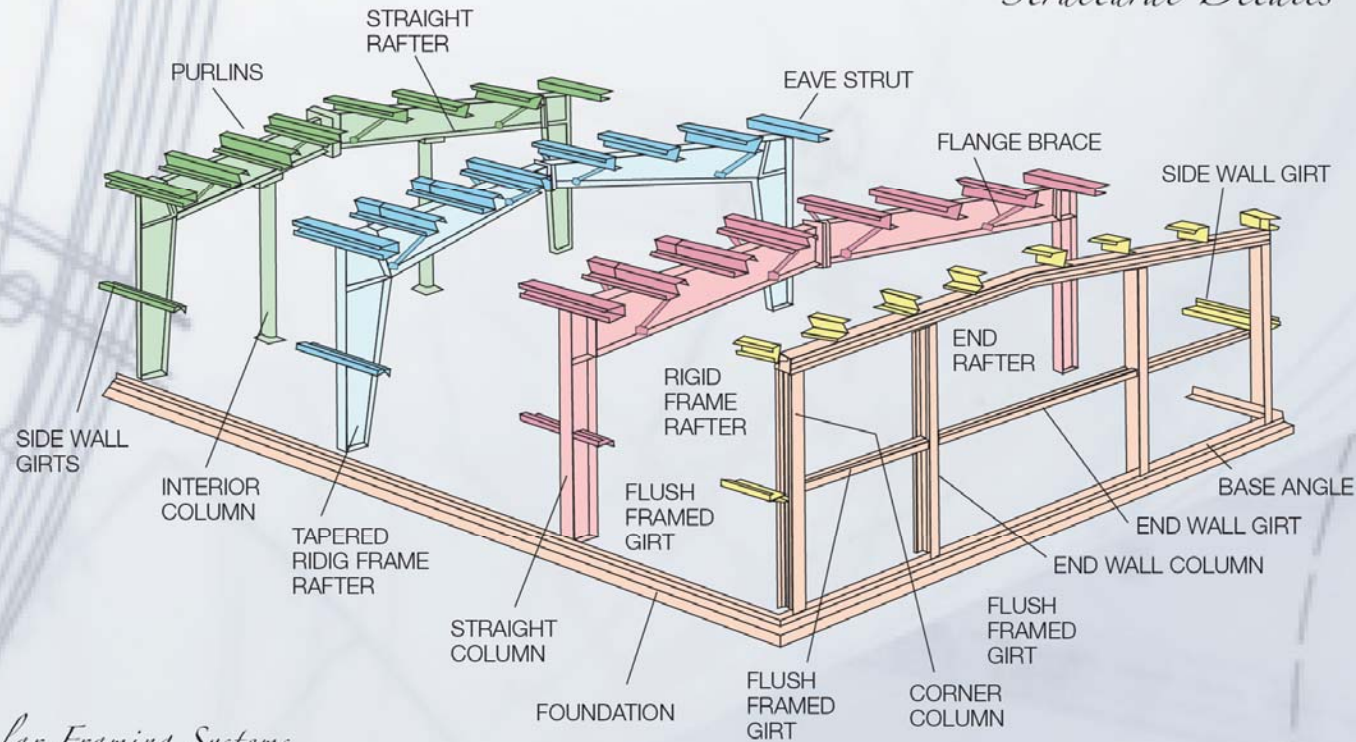

AIRCRAFT

Wide Array of Panel Profiles

Structural Details

FRAMING DETAILS

Popular Framing Systems

1

Low-Profile Rigid Frame

Designed for maximum unobstructed interior space without sacrificing strength. Ideally suited for aircraft hangars, manufacturing, warehousing and trucking terminals.

2

High-Profile Rigid Frame

Unobstructed floor space with higher vertical clearance and solid strength at an economical price. Perfect for churches, recreational facilities, manufacturing and warehousing.

3

Tapered Beam Straight Columns

Used in shorter-span installations and features uniform-depth columns to maximize available space. Well-suited for retail stores, small offices, service centers and warehousing.

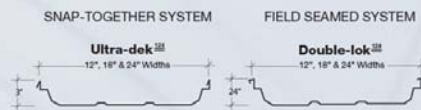

4

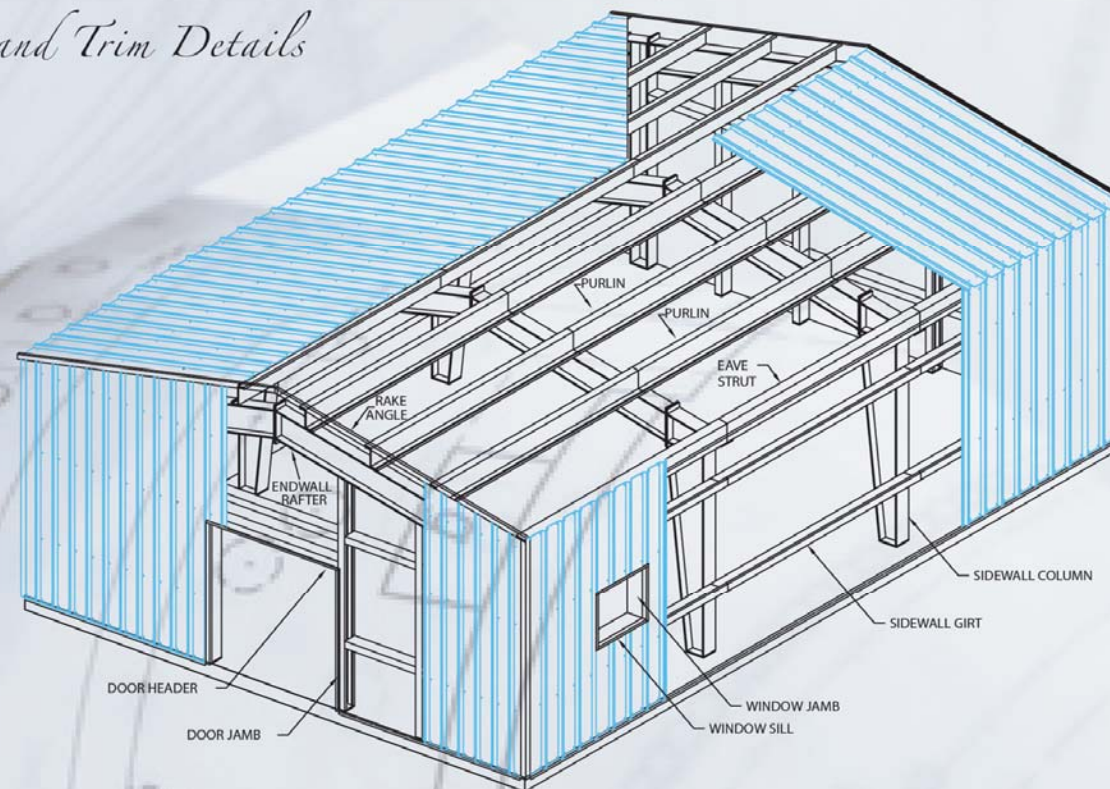

Lean-To

An affordable expansion unit that is compatible with any frame type. Commonly used for porches or office area.

Standing Seam Roof Systems

Sheeting and Trim Details

5

Single Slope

Available in clear and multi-span applications. A Single Slope provides drainage to one side, directing runoff away from building facades, entrances or parking areas.

6

Multi-Span Rigid Frame

Designed for large buildings, using a minimum of interior columns. Ideal for manufacturing, warehousing, retail space, offices and multiple industrial applications.

7

Custom Designs

Bunger Steel can custom-engineer almost anything you might request. Perfect for churches, recreational facilities, restaurants, retail establishments, offices, warehouses and more.

THE BENEFITS OF METAL ROOFING

EVERYTHING YOU WANT YOUR PROJECT TO BE.

A BUNGER STEEL METAL ROOF IS A SMART ADDITION
TO YOUR PROJECT FOR SO MANY REASONS

BEAUTY.

With Bunger Steel roofs, you can choose from a wide variety of attractive designer colors. Your roof will look fresh and vibrant for decades.

DURABILITY.

Metal roofs last much longer than either composition roofs or wooden shingles.

WEATHER RESISTANCE.

Bunger Steel roofs offer superior protection from wind, hail and fire.

LONGEVITY.

Bunger Steel offers limited paint warranties up to 35 years.

ENERGY EFFICIENCY.

Because of their high-tech coatings, Bunger Steel roofs can help lower your air conditioning and heating bills.

INSURANCE SAVINGS.

Insurance companies may offer discounts up to 35% for homes with metal roofs. Check with your agent.

Established in 1975, Bunger Steel is Arizona's only full service manufacturer of pre-engineered steel buildings. At Bunger Steel, we design and deliver complete steel building systems. This "single source" system enables us to produce a superior, quality-controlled product... while decreasing your cost.

Finally... A company where employees are professional and committed to meeting customer needs and desires in a fast, competent and considerate manner. It is these people who produce a product that is supported by years of research and development. Our product is produced in a professional manner from the initial estimate to the final delivery. Most important, all of our business is based on two major rules....

Integrity and Honesty....
